VENUE

**Organisation for Economic Co-operation and Development (OECD)
Conference Center**

2, rue André Pascal – F-75016 Paris - France

After the success of the OPTRO 2002 Symposium held in January 2003, and of the International Symposium OPTRO 2005 held in May 2005, 3AF organizes **OPTRO 2010**, the International Symposium on **OPTRONICS IN DEFENCE AND SECURITY**, to be held in Paris.

OBJECTIVES

This international Symposium presents the status on recent advances in Optronics in the fields of Defence and Security and on the perspectives that Optronics offers in the near future. OPTRO 2010 will gather engineers and scientists from government, university and industry and will implement fruitful exchanges between colleagues of different countries and disciplines. OPTRO 2010 will cover the current aspects of optronics but will also address emerging optronics technologies.

MAIN TOPICS

The different sessions will cover these topics :

- **Imaging and Systems**
- **Laser Sensors and Systems**
- **Sensors and components**
- **Space**
- **Signal and Imaging Processing**
- **Emerging Technologies**

The call for papers will be issued in May 2009.

Please note the Symposium dates in your agenda... and see you at OPTRO 2010.
